Finished size of the bag is 18" wide and 15" deep. A pocket on the outside is also a good idea. Use ½" seam allowance and double reinforcement.

The handles finish to 6" (cut 12½"). Sew handles to the very edge of each side to hook onto the wheelchair handles.

Any type of material can be used for this project. Material that is a little heavier would wear better. By doubling the length of the material, you will not have an extra seam.
