

## WHEELCHAIR BAGS

Finished size of the bag is 18" wide and 15" deep.  
A pocket on the outside is also a good idea.  
Use  $\frac{1}{2}$ " seam allowance and double reinforcement.

The handles finish to 6" (cut  $12\frac{1}{2}$ ").  
Sew handles to the very edge of each side to hook  
onto the wheelchair handles.

Any type of material can be used for this project.  
Material that is a little heavier would wear better.  
By doubling the length of the material, you will  
not have an extra seam.
